## LiYY PVC Data Cable

## APPLICATIONS

LiYY cables are data transmission cables which have been developed from well proven types based on the specification VDE 0812. For use in flexible or stationary applications under low mechanical stress with free movement without any tensile stress, loads or forced movements in dry, moist and wet conditions. Commonly used as control and signal cables in the electronics of computers systems, electronic control equipment, office machines and measurement devices in the tool making and machine industries. LiYY is recommended when a small outer diameter is required. Not permitted for outdoor use.
