PUR Sheathed Chain Cable (Multipair)

APPLICATION

This highly flexible pair wise stranded cable chain data cable is best suited for different industrial areas such as machine construction, the automobile and communications industry, as well as for steering, controlling and measuring machinery. It is particularly useful for machinery that is put to prolonged use, such as machine controls. The paired cable suppresses electrical couplings of individual signals whilst effectively lowering near- and crosstalk attenuation. The copper braiding should be fully connected to optimise protection against high frequency external interference (EMC).

CONSTRUCTION

Conductor: Flexible stranded tinned copper wire to IEC/EN 60228 Class 6.

Insulation: TPE-E or PP.

Wrapping

Braid: Screen of tinned copper braiding.

Outer sheath: Polyurethane (PUR), poor in adhesion, oil and abrasion resistant, UV-resistant.
