 ADDISON

Caledonian & Addison, established in 1978, produced a wide range of copper and fiber optic cables for communication, power and electronics in its 2 plants in UK and 5 plants in China, with turnover exceeding USD exceeding USD 40 million in Yr 2004. Caledonian products are sold in more than 35 countries around the globe.

Our extensive global network of manufacturing facilities gives us significant scale and the flexibility to fulfill our customer requirements. This global presence provides design and consultancy solutions that are combined with core cable manufacturing and logistics services, and vertically integrated with our E commerce technologies, to optimize customer operations by lowering costs and reducing time to market.

Caledonian & Addison has been respected for its high standards of quality, excellent service level, competitive pricing and a unique and innovative spirit. With our latest technologies, we are both inspired and well-positioned to meet the changing needs of our customers. We have the resources to diversify and to enhance our product lines and services. We understand the need for change and with our accurate planning we are ready for the future and the promise of new marketing opportunities. Our tradition of growth through excellence is assured.

Our Design Centers work closely with customers to constantly improve its standard range of products and technologies and to develop customized, country and industry-specific solutions. Caledonian has established an extensive network of design, manufacturing, and logistics facilities in the world's major markets to serve the growing outsourcing needs of both multinational and regional customers.

750V, 1500V, 3000V**

A. Conductor B. Insulation

Application

- Used as power and control cable for protected installations inside and outside of rail and transport vehicles, where handling and installation cost are an important factor.
- Used in control, auxiliary and main circuit wiring such as cable harnesses, switchboards and control panels, driver desks etc.

Construction

Conductor

Tinned copper wires

Separator (if available)

Insulation

Cross-link Polyolefin insulation

Electrical & Mechanical Properties

Nominal Voltage	750V, 1500V, 3000V
Operating Temperature	-55°C/+125°C
Minimum Bending Radius	3 x Overall Diameter (OD≤20mm); 5 x Overall Diameter (OD≥20mm)

Fire Performance

Flame Retardant GB 12666-90 DZ-1

Low Corrosivity (Acidity & Conductivity) GB/T17650.1-1998; GB/T17650.2-1998

Chinese Standard Rolling Stock Cables

**Low Smoke Halogen Free Flame Retardant Single Core Cables
WDZ-DCEVM-100, WDZ-DCEVM-125 1.8/3kV**

A. Conductor B. Insulation C. Sheath

Application

- Used as power and control cable for protected installations inside and outside of rail and transport vehicles, where handling and installation cost are an important factor.
- Used in control, auxillary and main circuit wiring such as cable harnesses, switchboards and control panels, driver desks etc.

Construction

Conductor

Tinned copper wires

Separator (if available)

Insulation

Low smoke halogen free flame retardant compound

Sheath

Low smoke halogen free flame retardant compound

Electrical & Mechanical Properties

Nominal Voltage	1.8/3kV
Long-term Working Temperature	100°C (WDZ-DCEVM-100); 125°C (WDZ-DCEVM-125)
Lowest Operation Temperature	-40°C
Minimum Bending Radius	2 x Overall Diameter (OD≤10mm); 4 x Overall Diameter (10mm≤OD≤20mm); 6 x Overall Diameter (OD≥20mm)

Fire Performance

Flame Retardant	GB/T18380.1-2001; GB/T18380.3-2001 C
Low Corrosivity (Acidity & Conductivity)	GB/T17650.1-1998; GB/T17650.2-1998

Chinese Standard Rolling Stock Cables

Railway Passenger DC Power Connector Cables WDZ-DCK-125 750V

A. Conductor B. Insulation C. Sheath

Application

- Used as power and control cable for protected installations inside and outside of rail and transport vehicles, where handling and installation cost are an important factor.
- Used in control, auxiliary and main circuit wiring such as cable harnesses, switchboards and control panels, driver desks etc.

Construction

Conductor

Tinned copper wires

Separator (if available)

Insulation

Low smoke halogen free flame retardant compound

Filler

Separator

Sheath

Low smoke halogen free flame retardant compound

Electrical & Mechanical Properties

Nominal Voltage	750V
Long-term Working Temperature	125°C
Lowest Operation Temperature	-40°C
Minimum Bending Radius	2 x Overall Diameter (OD≤10mm); 4 x Overall Diameter (10mm≤OD≤20mm); 6 x Overall Diameter (OD≥20mm)

Fire Performance

Chinese Standard Rolling Stock Cables

Low Smoke Halogen Free Flame Retardant Rolling Stock Multicore Jumper Cables WDZ-DCKPJ-100 300/500V

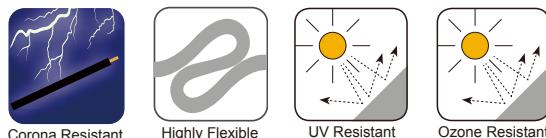

Application

- Used as power and control cable for protected installations inside and outside of rail and transport vehicles, where handling and installation cost are an important factor.
- Used in control, auxiliary and main circuit wiring such as cable harnesses, switchboards and control panels, driver desks etc.

Construction

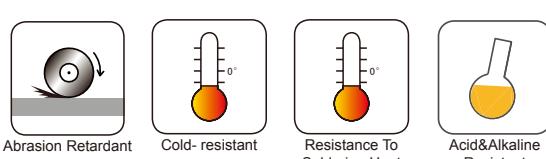

Unscreened Conductors

Tinned copper wires with low smoke halogen free flame retardant insulation

Screened Wires

2x1mm² tinned copper wires with low smoke halogen free flame retardant insulation and screen.

Filler

Sheath

Low smoke halogen free flame retardant compound

Electrical & Mechanical Properties

Nominal Voltage	300/500V
Long-term Working Temperature	100°C
Lowest Operation Temperature	-25°C

Chinese Standard Rolling Stock Cables

Low Smoke Halogen Free Flame Retardant Rolling Stock Multicore Jumper Cables WDZ-DCKT-P-125 750V 2×2×1.25+5×2×1.25+3×3×1.25

Application

- Used as power and control cable for protected installations inside and outside of rail and transport vehicles, where handling and installation cost are an important factor.
- Used in control, auxillary and main circuit wiring such as cable harnesses, switchboards and control panels, driver desks etc.

Construction

5×2×50/0.18mm² & 2×2×1.25mm² Element

Tinned copper wires with low smoke halogen free flame retardant insulation. Two insulated wires are twisted together to form a pair. Every pair is screened and sheathed. Pairs are stranded with fillers and covered with an element sheath.

3×3×1.25mm² Element

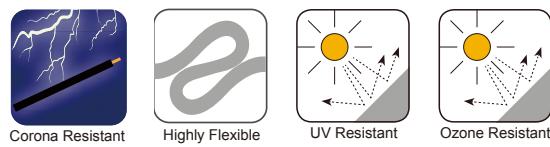

Tinned copper wires with low smoke halogen free flame retardant insulation. Three insulated wires are twisted together to form a triple. Every triple is screened and sheathed. Triples are stranded with fillers and covered with an element sheath.

Filler

Wrapped

Outer Sheath

Low smoke halogen free flame retardant compound.
